

METHANE EMISSIONS REDUCTION PROGRAM

KEY PROGRAM CLOSURE DECISIONS

- New applications are no longer being accepted.
- All applications that have not been pre-approved to date will not receive approval and the program is now closed.
- There will be no waitlist for projects which have not been pre-approved.
- All pre-approved projects will continue unaffected.
- All pre-approved DTC projects will continue but will have a one-year deadline to be completed.

FAQ PARTICIPANTS

Is the Methane Emissions Reduction Program ending?

Yes, the Methane Emissions Reduction Program is closing.

Who do I speak to about my concerns and losses?

If you have any questions, please contact your account manager or reach out to Energy Efficiency Alberta; contact information for each program is available at efficiencyalberta.ca.

Application Status

I have submitted an application that has not been pre-approved yet. What will happen to it?

The Methane Emissions Reduction program is now closed. If you have not received pre-approval on your application, it will not be pre-approved, and there is no waitlist.

Does this mean there's a chance my application won't be processed/pre-approved, and I won't receive my incentive payment?

If your application has not been pre-approved, it will not be processed or pre-approved.

Pre-Approved Projects

My project was pre-approved, and I've completed the work and submitted the invoice. When will I receive my incentive cheque?

If you did not apply or receive pre-approval from Energy Efficiency Alberta for an incentive toward your project, Energy Efficiency Alberta cannot fund the project.

Commitments

I already put down a deposit/committed to a project/ordered product relating to a project I was going to submit. How do I get my money back now that my application hasn't been approved?

If you did not apply and received pre-approval from Energy Efficiency Alberta for an incentive toward your project, EEA cannot fund the project.

What if I have already begun, purchased equipment for, or completed my project and did not have pre-approval.

If you did not receive pre-approval from Energy Efficiency Alberta for an incentive toward your project, you were not guaranteed funding. As the program is now closed, your application will not be pre-approved for an incentive payment. Beginning your project prior to approval was a risk. We encourage you to review the full terms and conditions of our program for more details.

Why didn't you communicate this change earlier?

We have been working closely with the new Alberta Government to communicate these changes. I can assure you we are providing information on our programs as soon as decisions are made, and information is available. We will continue to operate with this transparency.

Looking Forward

Do you expect there to be any programs to support methane emissions reductions in the future?

The Methane Emissions Reduction program is closed and will not reopen. New energy efficiency programs for the commercial and industrial sectors have not been confirmed.

If I have a submission now, will that help me access any new programs??

No. All projects will be required to re-apply into any forthcoming programs when details become available.
